CLAIMS 1-24 ARE PENDING

1. The following is an examiner's statement of reasons for allowance:

The use of a cache benefit analysis was well known in the art at the time of the invention, as evidenced by Greenwood et al (Greenwood), US 5,568,181. Greenwood analyses the total benefit of caching requested (video) files by keeping an ordered list of file activity and determining if enough cache space can be created to store a requested file, and if so, the transfer of the file is scheduled [COL 5 lines 29-55]. The benefit analysis is directed at maintaining those files most frequently requested.

It was well known in the art at the time of the invention to download and update files when out-of-date, as evidenced by Reisman, US 5,694,546 [see previous action]. Reisman is directed to automatic transport to preset file areas [COL 6 lines 41-47], which could correspond to a local database cache, in order to replace out-of-date files. As claimed, download occurs before any cache benefit analysis is applied.

It is considered, however, that the potential removal of other files prior to transport as required for implementing the cost benefit analysis of Greenwood has no apparent application to the update transport mechanism of Reisman. Thus the claims are neither anticipated nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
